View personal Leave History, View Leave Application, Pagination, Combining Codes
- Jason Tay Neng Wei  
Submit Leave Application, Retrieve/Delete Leave Application, Combining Codes

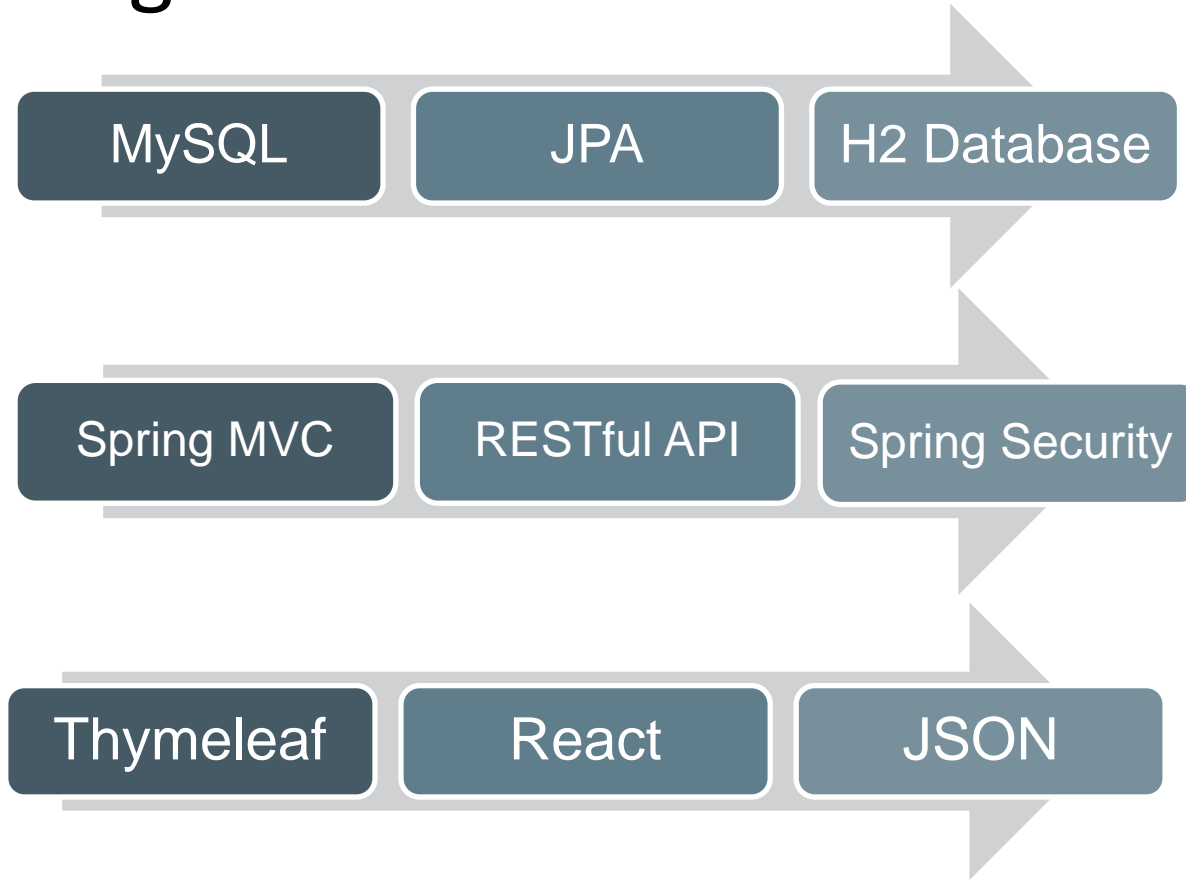

# Layer & Dependencies

# ERD

# Technologies

# Summary

- Understand how the database and back-end are linked together and how to use very few statements in the back-end model to fulfill the CRUD operations in the database.
- Mastered the way to connect the backend to the frontend and how to make the backend receive requests and render the corresponding frontend pages through different HTTP paths.
- Mastered the basic thymeleaf expression syntax and ensured that the user's input values conformed to the specification through different methods.

# Thank for Listening
